

Learn how a **Healthcare coaching company** got **HITRUST** certified within **18 months** of starting with **Accorian**.

Situation

Our client needed to be HITRUST certified for several their contracts. As a start-up that had grown rapidly, they didn't have the right cybersecurity maturity in place.

Solution/Approach

Accorian's Security compliance experts worked with the management team for a company wide adaption of policies and procedures that would render the organization to be HITRUST certified. For HITRUST they had 276 control statements that needed to be met.

Approach:

- Identified gaps and risks against the HITRUST controls
- Set up effective policies & procedures – wrote over 200 procedures
- Work with their IT team and Business SME to plan and implement all requirements
- Conducted overall security testing – both application and network penetration testing
- Conducted a detailed risk assessment of their systems
- Performed vulnerability scan and penetration testing on 100+ devices
- Developed 2 year Enterprise roadmap around cybersecurity & HITRUST Certification
- Added a program manager to coordinate implementation across multiple vendors and internal IT

Result

Accorian's team of experts and certified CSF practitioners collaborated every step of the way with client team to aid through the certification journey within 18 months.
